

INDUSTRIAL DIVISION > ULTRA-HIGH PRESSURE PUMPS

High flow and pressure are tasks for our **Industrial Division** for its comprehensive pumps and accessories supplied in any industry: the iron and steel, the chemical and petrolchemical, the building, the water treatment, just to mention a few.

The range of triplex pumps counts over 60 different models including flow rates up to 420 liters per minute, pressures up to 1500 bar, powers up to 150 HP, all models designed and produced to stand the toughest working conditions.

Used in a multitude of industries for a very wide range of applications. In manufacturing for instance the pumps provide the fluid power for cutting tables, deburring machines, parts washers, casting de-coring systems, robotic fettling, hydraulic presses, hydrostatic test installations, non woven fabric production installations and many more.

Production enhancing maintenance systems are supplied to the automobile, rolled aluminium and steel products, petrochemical and plastics, bauxite processing and paper producing industries.

Specialist industry customers are found in surface preparation, hydro demolition, pipeline renovation and offshore maintenance contracting.

With innovative engineering responsible for a pump range with power ratings up to 750 kW and operating pressures up to 4000bar we are dedicated to providing solutions to meet industry requirements.
